Oil cake, bbls.	376,200 Butter, pails 449
Sugar turp. gals.	22,040 Honey, bbls. 449

## GENERAL MARKET REPORT.

**N.Y.—COTTON.**—The market closed about 40 cents lower on August 1 with other months showing a slight increase. The decline in August was due in a large measure to a liquidation of that month and to rains in Texas, which have practically cut off all the cotton growing there. The market closed with a net loss on the week, 40 cents lower than the lowest. August fluctuated within a range of 15 points, and other months were within a range of 80-100 points. The 200,000 bales Liverpool was evidently influenced by reported rains in Texas, and it closed with a net loss on the week of 40 cents lower. The reports from Liverpool were distinctly disappointing, as the drops there were relatively greater than our decline Saturday, and they are now anxious to get out of the market. It is to talk with spinners having low supplies on hand. In this connection it may be said that it is believed that the consumption of cotton in August is a fair demand, or 8,000,000 and 8,000,000 bales. It is only if the season is entered at low prices. Southern cotton markets were weakened under the general influence of the market in Texas; there was rain in the Carolinas, Georgia, Mississippi and Arkansas. The Dallas news says: "There is no doubt that Texas had a half inch or less rain last week. Great damage is expected in low lands of North Carolina." Advances from Liverpool were not so great as those from cotton and that is a source of strength to near delivery. These advances say that what is happening in July will be true in August and September, and price action will be similar for a while, at least. New-York will have to take its inspiration from Liverpool as to the cause of prices. There are 8,000,000 bales in various stocks. It is said that prices are quite low enough, as with present supplies of American cotton a crop of the world will be required to meet the consumption of the world next season.

**OPENING, RANGE AND CLOSE FOR DAY AND CLOSING FOR LAST WEEK.**—New-York, July 13, 1896.

**COTTON.—**The market closed about 40 cents lower on August 1 with other months showing a slight increase.
